### Bio

"Splitter" is the stage name of a nineteen-year-old musician born in Germany / Bremen. His musical pieces have a slight electronic touch to them and they convey a sense of freedom and zero gravity, nowadays probably only found in film music. The mostly instrumental tracks hover somewhere between bands such as "Boards of Canada" and "Arms & Sleepers". They tell a tale that emotionally captivates.

### About Thea

While "Splitter" has been around since 2010, it is thanks to the Hamburg record label "Finaltune Records" that his music is now emerging. His discography includes three albums. The fourth album, which is going to be named "Thea", will be released on November 8th 2013 and it will be the first official CD release under Finaltune.

*"Electronic music offers so many possibilities that I can't find anywhere else. When I compose „Thea“ I always have a certain picture, a story or a scenery in my head - what I do then is to try and portray that through my music. I no longer see MIDI or audio tracks. I find myself right in the middle of this setting and every synth and every pad become a part of the scenery."*
